

CHANGE NOTICE

P.O. Box 8400
Green Bay, WI 54308-8400
(920) 468-8100

Implemented By: OEI/KI

Notification By: Jim Noll

Date: 1/1/2008

Component Product Title: **New T-5 Tasklight**

Effective: **1/1/2008**

ECN: # 10932

Description of Change: Effective Jan 1, 2008 KI/OEI will begin substituting the new T-5 tasklight in place of the current under cabinet tasklight.

Reason for Change: The new T-5 task lights have been designed to be a more environmentally friendly light, as well as being easier to specify and stock due to reducing the product offering.

The T-5 task light uses an energy efficient rapid start T-5 bulb as well as an electronic ballast so the customer can realize up to a 37% energy use cost reduction depending on the size light specified. The steel case the T-5 light uses has been made with less steel to conserve the materials required for each light, as well as offsetting the increases in steel prices that have been happening the past few years. The packaging for the T-5 light has also been reduced making it more environmentally friendly.

Specifying the T-5 tasklight will be easier as it has been reduced to four lengths (18", 24", 36" & 48") and simplified to one case color – black.

The method of mounting the lights is similar to the old style: spring steel straps on the TLT5 lights and mounting brackets on the BTLT5 lights for the Venus overheads.

Action Required: If you are using the OEI Encompass CAD™ software to plan your furniture layouts, it will automatically begin placing the new T-5 lights in place of the existing styles. The correct size light will be placed depending on the overhead storage unit it is being specified under.

If you do not regularly update your Encompass CAD™ (formerly FMCS) please contact Sandra Welch at 920-406-3497 or Jeff Bohlman at 920-406-3302 for instructions on how to do so.

If you are not using the Encompass CAD™ software see the attached chart that will tell you what lights go on what size overhead storage units. There are some differences compared to the previous styles of lights that are shaded on the chart.

Any literature that contains the old style task lights will be revised as the literature is reprinted. Please cross out any pages showing the old style in literature you may have on hand.

Customer Notification: UNICOR DC, Englewood & Coleman, all State customers.

Encl: Planning rules for the new T5 task lights
