Implemented By: OEI/KI-MN

Notification By: Jim Noll

Date: 6/13/2008

Component Product Title: **Paper Management Tool Rail for FlexStation & XXI Notes Laminate End Overhead products**

Effective: 6/1/2008

ECN: # 11324

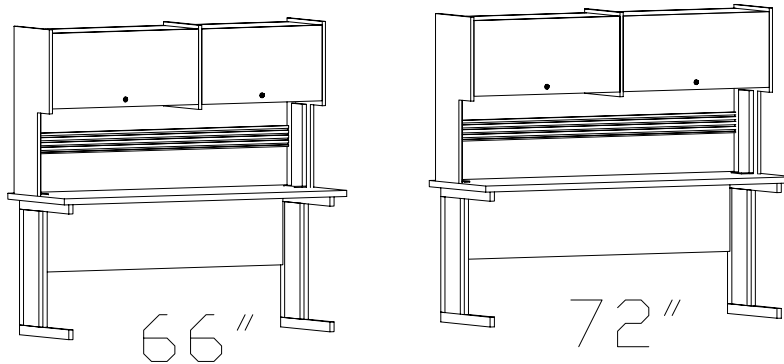

Description of Change: Introduction of a full length Tool Rail to be used with FlexStation/XXI Notes 66" & 72" Laminate End Overheads.

Reason for Change: With the Jan 1, 2008 elimination of the Traditional Paper management product a situation was created where there was not a proper length Tool Rail that could be used with the FlexStation/XXI Notes Laminate End Overheads in 66" & 72" lengths. The PMTRxx.color Tool Rail was designed for use with the Universal style overheads that had a center support upright. The PMTRxx.color came as two shorter length Tool Rails that attached to the 3 uprights. Since the Laminate End OHs do not have a center upright, the PMTRxx.color would not work.

The new model numbers for the Tool Rail that will span the full distance between the Laminate End panels are:

PMTR66LAM.color

PMTR72LAM.color

These LAM style are only required for the 66" & 72" length Tool Rails/Laminate Overheads. All the smaller size PMTRs are the correct length.

Action Required: Any literature that contains the PMTR 66 & 72 paper management Tool Rail will be revised as the literature is reprinted. Please add the LAM to the model number of any product lists showing the 66 & 72 Tool Rail in literature you may have on hand.

Remove/crossout the PMTR66.color & PMTR72.color from any literature or databases you use.

OEI's Encompass CAD™ software inserts the correct PMTRxxLAM. style Tool Rail on 66" & 72" Laminate End FlexStation/XXI Notes overheads.

If you do not regularly update your Encompass CAD™ please contact Sandra Welch at 920-406-3497 or Jeff Bohlman at 920-406-3302 for instructions on how to do so.

Customer Notification: UNICOR DC, Englewood & Coleman, all State customers.
