

CHANGE NOTICE

P.O. Box 8400
Green Bay, WI 54308-8400

To: All OEI Systems and Powerworks Customers

From: Bob Raisanen

Date: 6/19/09

Re: Worksurface Slimline Grommet Outer #39-06-6021 (Revised)

This memo is to notify all System XXI and Powerworks Customers the Slimline Grommet outer #39-06-6021 has been modified to include (3) tabs to help the grommet remain in place on the worksurface when the cover #39-06-6020 is pulled off. This change will eliminate the need to fasten the grommet outer to the worksurface at installs. The change will be a running change part #'s and pricing will remain the same.

Note: Current grommet and the new revised grommet function the same and can be mixed on projects.

The new grommets will begin shipping on orders in July 09.
Please contact Bob Raisanen @920.468.2538 with any question or concerns

Thanks,
Bob Raisanen
