

# UNIFY™ Tables

## Unify

Imagine a room that can convert to anything you want it to be...cafeteria, auditorium, gymnasium, assembly hall.

Unify Tables make it easy to accommodate any number of functions in one space. They are the easiest to operate, easiest to move, easiest to rearrange, easiest to store, even easiest to clean under. In fact, Unify Tables, with their unique combination pneumatic lift assist and torsional energy system, have the smoothest

most effortless operation in the industry. Their lower overall folded height and smaller frame stance allow for easy doorway clearance. They nest in a condensed footprint and therefore require the least amount of storage space. Unify Tables are also easy and inexpensive to own.

Unitized all-steel frames provide superior strength. Durable seats, tabletops and frames are built to last.

Unify's gravity down-lock assures safe operation and keeps tables in the open position. Sufficient clearance between tops prevents pinched fingers.

Fingertip control and effortless folding are the results of Unify's exclusive combination of pneumatic lift assist and torsional energy storage system.

Carefully engineered casters add stability and maneuverability. The caster support has a sleek tamper-resistant cover that won't trap dust, dirt or food and won't scuff shoes.

Unify Tables with seating move safely through standard door openings. Seats store parallel to the tabletop to minimize dust built-up during storage.
